## STANDARD COMPANY MODEL IN EQUIPMENT

UNIQUE MECHANICAL IDEAS IN OPERATION.

Took Less Than a Year to Put the Property On a Successful Producing Basis—Double Track Gravity Train From Mine to Tipple.

The last issue of the Salt Lake Mining Review has an excellent illustrated writing of the Standard Coal company. A portion of it follows:

"This is one of the latest of Utah's successful industrial enterprises, the most recent achievement in coal mining operations in the state, and especially remarkable because of its unique equipment and the brief period required in transforming a virgin piece of coal-bearing ground into a producing and profit-making mine.

"The Standard coal proposition was conceived and carried to successful fruition by F. A. Sweet and L. F. Hains of Salt Lake City, prominent in business and financial circles as well as in coal mine operation. The company began construction work on July 10, 1913, when the first pick was struck into the ground in the building of a mile of standard gauge railroad from the Helper branch of the D. & R. G. railroad to the mine tipple site.

When this work was well under way, tipple yards and tipple construction was begun, and ground was broken for the building of the mile of double track gravity tramway from the mine to the tipple. This work was delayed for three or more weeks by inclement weather and heavy snow storms; and yet, notwithstanding these difficulties and obstacles, the first trip of coal arrived at the tipple February 10, 1914, just seven months after actual construction operations had commenced; and, marvelous as it may seem, the company is now operating upon a profitable basis, as shipments now average 400 tons of coal daily, and the output from now on will be rapidly increased, while the company, already, has found a ready market for its product in Utah, Idaho, Oregon, Washington, Montana, Nevada and California.

The equipment installed by the Standard company is modern and up-to-date in every particular and represents the latest word in all that pertains to coal mine operation. In the construction of the plant many new ideas and innovations were introduced, all tending to economical operation and the elimination of costs, to say nothing of safety and permanency. As a matter of fact no coal made in the West was ever before provided with equipment of like character, and nowhere else in this intermountain region has every feature of a coal-mining plant been so stripped of burdensome and inefficient methods for coal handling as has the Standard Coal; which fact, without a question of doubt, will be most effectively demonstrated by the balance sheet when production has reached full capacity."

Most Prompt and Effective Cure For Bad Colds.  
When you have a bad cold you want a remedy that will not only give relief, but effect a prompt and permanent cure, a remedy that is pleasant to take, a remedy that contains nothing injurious. Chamberlain's Cough Remedy meets all these requirements. It acts on nature's plan, cures the lungs, and expels the mucus, opens the air passages and restores the system to healthy condition. This remedy has a world wide sale and use, and can always be depended upon. Sold by all dealers.—Advt.

Twenty-Two Thousand Dollars Voted For Water Supply.

The Helper election last week providing for the issuance of \$22,000 worth of bonds for the installation of a water system was carried by a vote of 11 to 17. The adjoining town is determined to improve its water supply. The point of diversion for the Price supply is even below Helper.

### HELPER BONDS CARRY

Health a Factor in Success.  
The largest factor contributing to a man's success is undoubtedly his health. It has been observed that a man is seldom sick when his bowels are regular—he is never well when they are constipated. For constipation you will find nothing quite so good as Chamberlain's Tablets. They not only move the bowels but improve the appetite and strengthen the digestion. They are sold by all dealers.—Advt.

### ELECTION FOR HELPER

Dry Conduct Quiet Campaign and Secure Percentage.

There are eighty-five residents of the town of Helper that want to put their town in the dry column. At least there are that many if signers to a petition mean anything.

Very quietly the dries conducted their campaign and succeeded in securing more than the necessary 25 per cent of the registered voters, which is said to be exactly two hundred and forty. The fact that the reformers were able to secure so many names comes as a surprise to everyone and there seems to be little chance for them to win when the matter comes to a vote, as Helper is hopelessly wet.

The Helper Times assigns the reason for the petition as due to petty jealousies.

### Coughed For Three Years.

"I am a lover of your goodness to humanity and science. Your medicine, Dr. King's New Discovery, cured my cough of three years standing," says Jennie Flemming of New Dover, O. Have you an annoying cough? Is it stubborn and won't yield to treatment? Get a 50 cent bottle of Dr. King's New Discovery today. What it did for Jennie Flemming it will do for you, no matter how stubborn or how chronic a cough may be. It stops a cough and stops throat and lung trouble. Relief or money back. 50c and \$1. at your druggist. Booklen's Arnica Salve for pimples.—Advt.

### HUMANE HANDLING OF SHEEP NOW PREVAILS

That there has been a big improvement at the sheep shearing corral of the state this year, as a result of the agitation for more humane treatment of sheep, is the opinion of C. B. Stewart, secretary of the Utah Woolgrowers' association. Mr. Stewart bases his opinion on observations he made while on a two weeks' trip through the state. He says that conditions at all the corrals are much improved.

Bargains in Typewriters.  
Another shipment of the famous L. C. Smith & Bros. typewriters has been received this week by The Advocate. Price, \$75, payable in 15 monthly installments. The Advocate.
